FREE CURE FOR MEN.

A Michigan Ham Offers to Send His Dis covery Free-Claims to be a Benefaciou to Weakened Hankind.

A fichigan Has Offers to head His Discovery Free-Calims to be a Beneficiar to Weakened Mankind.

There is always more or less suspicion attached to anything that is offered free but sometimes a man so overflows with senerosity that he cannot rest until his discovery is known to the world, in order that his fellow men may profit by what he has discovered. It is upon this principle that a resident of Kailamasoo, Mich., desires to send free to mankind a prescription which will cure them of any form of nervous debility; relieves them of all the doubt and uncertainty which such men ser peculiarly liable to and restores the organs to natural size and vigor. As it costs nothing to try the experiment it would seem that any man, suffering with the nervous troubles that haually attack men who never stopped to realize what might be the final result, ought to be deeply interested in a remedy which will restore them to health, etrength and vigor, without which they continue to live an existence of untold misery. As the remedy in question was the result of many years research as to what combination would be peculiarly effective in restoring to men the strength they need, it would seem that all men suffering with any form of nervous weakness ought to write for such a remedy at once. A request to H. C. Olds, Eox 1786, Kalamaso, Mich., stating that you are not sending for the prescription out of idle curiosity, but that you wish to make use of the medicine by giving it a trial, will be answered promptly and without evidence as to where information came from.

The prescription is sent free and although some may wonder how Mr. Olds

from.
The prescription is sent free and although some may wonder how Mr. Olds can afford to give away his discovery, there is no doubt about the offer being genuine. Cut this out and send to Mr. Olds so that he may know how you came to write to him.

Commercial bills \$4.87565.819er certificates \$43.66556. Har silver 64% c. The stock market continued to-day to

feel the influence of the bear aggression in the industrial stocks, but the general list did not respond so sharply to this depressing effect and railway shares held their own fairly well in the face of a market tending downward. That the market is largely given over to the industrials is shown by the fact that considerably more than half the total shares traded in were those of a few of the high-priced industrials and more than on-thrid of the sales of sugar stock alone.

The movement resulted in a decline in sugar of 2½; tobacco 2½; rubber 2½ and Leather I per cent. All of these stocks suffered in common from the continued effect of the legislative investigation of trust still pending in this city. Sugar was also markedly affected by further reports from Washington that the protection on Sugar was likely to be impaired by approaching tariff changes, Whatever affected sugar immediately and markedly affected all the other industrial stocks by sympathy. Tobacco was sold by inside interests. The market for other securities was signant and seemingly waiting for developments, though of what is not clear to any observer. If the waiting is for oming tariff changes, it is strange that only the properties which will be immediately affected by those changes are dealt in h any volume. With money a glut in the market, however, and speculation almost at a standstill it is certain that investors are walting for some development. There were signs to-day that some encouragement was felt over the general trade outlook and over the prospects for railroads. The railways shares exhibited considerable firmness and even advanced fractionally early in the day in spite of the depressing influence on the market of the stagnation in the London market and the drive at the industrials. The railways where also somewhat affected by the entry in the propency of the general list. The hardening tendency of the general list. The hardening tendency of the general list. CHICAGO.—Wheat to-day recovered twice as much as it lost yesterday, the May option closing at a full %c advance. There was no particular reason for th concerned, but the bulls were once more in the majority and prices were forced upward. Corn recovered 1/2 and oats advanced 1/4/9/1/20, Provisions closed 5/9

lic higher.

Wheat opened weak at from 76½ to 76¼c for May, as against 76½676%c, lis closing price yesterday. The Liverpool market, which recently has displayed a good deal of readiness to follow declines on this side, opened at ½d decline. The chief reason for the weakenss here, which

chiefreenson for the weakenss nere, wain may have also been an influence in Liverpool, was a statement made by the Liverpool, was a statement made by the Liverpool Corn Trade News to the effect that the world's stocks of wheat and flour, which decreased 16,000,000 bushels between January! and February 1 1836, only decreased 1,700,000 bushels in the similar time this year. The statement was a surprise to the trade, as the reverse of such result of supply and consumption this year compared with last had been generally expected.

The later cables showed recovery to the English market. Explanations from the other side hinted at the political complications which might result in a scratch of war. This became a factor in the market, The heavy northwest receipts of 552 cars were offset by the flour sales of 35,000 barrels and the talk of mills paying May price for wheat, and prices then started to mend. After the recovery was fairly started the trade got bull helps. St. Louis messages revived the crop injury talk. Central Illinois points sent complaints of a serious nature. New York reported liberal exports for the day. The four ports cleared 350,000 bathels of wheat and flour. Buyling on the foreign war talk before mid-day put the price of May to 77½c. Bradstreet's report of the world's visible showing only 573,000 bushels decrease last week caused the board adjourning at 12:15 p. m. to enable the members to attend the functor of the late Hugh McMillan.

Corn was easy at opening with wheat and firmed later on the same account. Speculative business was rather better than the recent average and was largely in the way of coverling shorts. Export clearances were liberal. \$2,000 bushels. May opened a shade higher at 34,000 bushels of wheat and shorts showed a disposition to take profits. The firmitess in what and corn also helped oats. May opened unchanged at 17½c, cold to 17½@Tipe and shorts showed a disposition to take profits. The firmitess in wheat and corn also melped oats. May opened unchanged at 17½c, cold to 17½@Ti

BOSTON.—Business in the wool market continues active, yet while prices are firm it is difficult to work up any material advance. The bulk of the wool now being sold is for future use and the activity of the market is said to be owing to manufacturers anticipating a duty on wool. The market for territory wools is steady and the reports show large lines being taken on the scoured basis of 30%32c for most offerings of fine medium and fine, while choice staple lots are commanding 34% 5c. The sales of fleece wools have been light, owing to a number of dealers holding their products above the market price. Australian wools show large lines being taken, with prices firm.
